#### PARTENERUL TAU DE OTEL

Produse Metalurgice:

##### Table din Otel (rulouri si foi):

- tabla laminata la cald;
- tabla laminata la rece (decapata);
- tabla zincata, snata.

##### 2 linii de debitat tabla:

- 0,4-2,0mm x max 1250mm;
- 0,5-6,0mm x max 1270mm;

##### 3 linii de fasiat tabla:

- 0,5-2,0mm x 1000-1250mm;
- 2,0-8,0mm x 1000-1600mm;
- 5,0-20,0mm x 1500-2000mm;

##### 3 linii de productie teava Sudata:

- 10,0-32,0 x 0,5-2,0 mm;
- 17,0-42,0 x 1,2-3,5 mm;
- 38,0-114,0 x 1,2-4,0 mm

GLC  
CERTIFIED  
ISO 9001

##### Alte Produse Metalurgice:

- otel beton, oțel și sârlat /OB-PC/;
- tevi trase și sudate, tevi rectangulare;
- europrofile, corniere, oțel lat,
- oțel patrat, profil T;

##### - 6 depozite: Peste 40000 tone;

- 7 linii de productie profile zincate pentru gips-carton si armatura pentru toate sistemele de PVC - capacitate de productie peste 3.800.000 m.l. pe luna;

##### - 4 ateliere de fasonat oțel beton - 6000 tone pe luna;

# RIVERCLACK

RESOLUTION IN METAL COVERINGS

RIVERCLACK is a revolutionary waterproofing solutions for every type of roof. Thanks to its main form, aesthetics, design and technology saving qualities perfectly balanced system RIVERCLACK between technology and vision. Smooth metal roof sheathing RIVERCLACK is a new quality solution to your industrial and residential buildings that meet the latest architectural trends. The RIVERCLACK system performed with aluminum, aluminum 5754 with color coating, copper, alloy of zinc and titanium, stainless steel and galvanized steel shows a long service life of your roof covering. The RIVERCLACK system guarantees safety in harsh environmental conditions - acid rain, and other industrial pollution.

## Why Riverclack system:

1. Complete water impermeability  
Thanks to the sealing connections, this system is waterproof covering - even fully submerged water the system is extremely reliable for flat roofs.
2. Locking system without perforation  
Metal sheets are strengthened on the bearing structure without holes on the surface, which allows free linear expansion. Can be used sheets longer than of 100 m.
3. Endurance  
Aluminum, copper and steel sheets does not change over time and have tested guaranteed endurance of more than forty years.
4. Walking on the roof sheathing  
Normal traffic on each sheet does not leave any distortions except in cases of indiscriminate trampling on shell.
5. Easy installation  
Installation is quick, mark out free, and easy even for non skilled staff.
6. Operational efficiency  
Long life without maintenance - cost-effective for small and large roofs.

## 7. Features:

- Ecology of RIVERCLACK - all items are 100% recyclable.
- RIVERCLACK sheet can self curve down to a 25 m minimum radius (mill finish aluminum thickness 0.2 mm), simply by fixing the system while following the curve shape of the below structure, by attaching the system following the contour of the substructure.
- RIVERCLACK system designed to attach the panels photovoltaic panels without additional construction.
- RIVERCLACK allows you to build roof gardens and open green spaces on it.
- RIVERCLACK system takes minimum slope - 0.4%

## EASY OF INSTALLATION

The system is characterized by an exceptional ease of installation, with no sealants, gaskets or through perforations. Fasten is made by reinforced polyamide brackets to be placed along each spacer. They allow free thermal movement preventing in the same time thermal bridges or electro corrosion between RIVERCLACK and the below structure.

The system is installed using simple foot pressure onto the purpose designed polyamide bracket fixed to the spacer by two screw.

## RIVERCLACK sheet installation in 6 steps

## THERMOLUX

RADIATOARELE THERMOLUX sunt proiectate pentru incalzirea incalzirii incaperilor cu pierderi mici de caldura precum sunt baile, bucatariile, coridoarele sau incaperile unde este necesar accesul usurat pentru curatare.

Elementele orizontale ale radiatoarelor se produc din teava de otel Ø19, 20, 22 mm, iar cele verticale - din profile de otel cu dimensiuni 40x30 mm x 1.5 mm grosime, livrate in conformitate cu EN422.

**PVC gaskets for aluminum window systems**

Mo60 and Mo68 are co-extruded PVC profiles for Aluminum window systems. The rigid part of both of the profiles is in modifications for different types of Aluminum window frames.

PINE profile is flexible PVC profile for aluminum window systems. We have developed nine different dimensions suitable for different types profile systems.

RRP is a flexible PVC profile, especially designed for frames with nets/anti insect. We have designed four modifications for the different frame types.

DD gaskets are flexible PVC profiles. They have been specially designed for wooden window frames and doors. All types of DD approve high obturation between the opening parts.
